**NATURE
IN ITS FINEST
FORM.**

ON THE SAME PAGE AS NATURE. INDEX OF CONTENTS.

These 132 pages you're holding in your hand are filled with well over 700 perfect solutions from nature. The entire naturessa range is made entirely of fast-growing renewable raw materials. Some of these are unused residual materials from agriculture that would otherwise be discarded or go to waste; others are based on rapidly renewable raw materials derived from plants, such as the incredibly fast-growing bamboo. The raw materials used are 100 percent biodegradable and climate-friendly. All products developed from them are absolutely plastic-free, conserve finite fossil resources, feature impressive design quality and

offer excellent functionality. Moreover, since 2021, our entire product range is 100% climate neutral. Find out more on page 7.

Our main catalogue gives you an overview of our standard products made from seven raw material groups – all of which are in stock and available immediately. Virtually every requirement is catered to with the natural plates, bowls, dishes, lids, cups, glasses, drinking straws and cutlery. And much more is possible. Ask us if you want nature in a different shape!

THE NATURESSE PROMISE

«Nature in its finest form» – a promise that could not be more clear. It emphasises aesthetics as well as respect for nature, and it makes it clear that nature provides us with the perfect solutions for our every need.

naturesse is the future. And has been since 2003. We've had the answers to the plastic ban on individual product groups, which came into force in the EU in 2021, for nearly

20 years now. With a complete, comprehensive range of well over 700 permanently available products made from renewable raw materials, plus a wealth of bespoke customer solutions, naturesse is ready for a sustainable world. A world in which alternatives to petroleum and conventional plastics, as well as use of natural concepts, are gaining in importance. Ultimately, the aim is to conserve the earth's finite resources and reduce the amount of plastic waste – which of course works best with 100% biodegradable materials from rapidly renewable resources and 100% climate-neutral products.

We present to you with nature in its finest form: disposable products and food packaging that are sustainable and aesthetic, are produced fairly, and satisfy all safety requirements. The honestly earned certificates and labels gained by our audited naturesse products confirm your choice as the right one in social, ecological and food safety terms. It is our pleasure to guide you with personal advice, to offer you flexible and reliable support and to let you benefit from our complete network and knowledge.

FULL HOUSE! NATURESSE PACKAGING IS NOW CLIMATE-NEUTRAL

We have always been 100% natural. And 100% reduced-plastic or plastic-free, too. A while ago we also became 100% biodegradable. And now we have achieved the final 100%: all packaging, cutlery – in short all natureesse products – are now completely climate-neutral. We fully offset all relevant emissions of greenhouse gases, such as CO₂, so that you can serve your food and drink in 100% climate neutral products.

Climate neutrality means that the carbon footprint of natureesse products – from the cultivation of the raw materials to production to delivery – is calculated on the basis of

internationally recognised standards and offset by supporting certified climate-protection projects.

In addition to prevention and reduction, this offsetting of CO₂ emissions is an important step towards comprehensive climate protection and enables us to make an active contribution to the achievement of the UN Sustainable Development Goals. Our efforts are certified through the ClimatePartner «carbon neutral» label. You can see how much CO₂ we have compensated, the label, and information about the projects we are supporting at any time at ClimatePartner.

How do we make our packaging climate-neutral?

01

Fully calculate CO₂ emissions

02

Reduce CO₂ emissions

03

Fully compensate CO₂ emissions

04

Confirmed climate neutrality through recognised label and certificate

You can find the climate-protection projects, information on CO₂ compensation and the certificate [here](#).

THE RIGHT LID FOR EVERY APPLICATION

As a result of a development process over many years, all our lids for food trays are extremely functional, close perfectly, can be stacked and fit our wide assortment of square and round trays. For the **ready-meal delivery service**, the lids were fitted

with reinforced closing mechanisms so that meals containing liquids such as soups or sauces can be transported without any worries. Please note the types 1–4, which are also labelled as such in the catalogue.

COLD APPLICATIONS MADE OF PLA

Application: -18 to +40 degrees

Colour: transparent

A close-up photograph of several palm fronds, likely from a coconut palm, covered in numerous clear water droplets. The fronds are arranged diagonally from the top-left to the bottom-right. The lighting is soft, highlighting the texture of the leaves and the glistening surface of the water droplets. The overall color palette is a range of greens, from deep forest green to bright, vibrant green.

P A L M L E A F

WHEN A PALM TREE DELIVERS THE PLATES

Only when the leaves of the betel palm die and fall to the ground do we gather them up and shape them into natural disposable tableware. Our naturessa palm leaf products are processed at source – a sensible choice both for the environment and for us humans. This means that your tableware is environmentally friendly, fairly produced and 100 percent biodegradable.

Palm leaf
A GIFT FROM NATURE

01

*Raw material
betel palm*

02

*Dried palm
leaf sheath*

03

Finished product

The green leaves of the betel palm grow at heights of up to 25 metres above the ground. Once they lose their natural moisture and dry out almost completely, they **fall to the ground on their own** and can then be processed further. Any overexploitation is prevented in a natural way, because the green leaves still contain too much moisture and would quickly develop mould. Instead of leaving the fallen leaves to wither and rot on the ground, they are now shaped into superb disposable tableware.

Palm leaf products are ovenproof, food-safe and grease- and heat-resistant – all **without any additional coatings or the need for any additives**. The disposable tableware produced in this way remains 100 percent biodegradable. The particularly elegant style is also the work of nature: since each palm leaf has its

own uniquely elegant pattern of veins, any product made from it, is a uniquely stylish one-of-a-kind item.

The betel palm is grown in mixed culture, which preserves the soils. The natural palm leaf production in a small village in south-west India is carried out under **audited, fair conditions** and meets high social standards (certified to SA 8000). With the processing taking place locally, the inhabitants of an entire region can use their own resources to build up a lasting livelihood for themselves. Our palm leaf products are also certified according to **DIN EN 13432**.

A close-up photograph of several green sugar cane stalks. The stalks are arranged diagonally, showing their segmented structure and the nodes where they are cut. The color is a vibrant green, with some darker green areas near the nodes. The texture of the cane is visible, showing fine lines and some wear. The text "SUGAR CANE" is overlaid in the center in a white, sans-serif font.

SUGAR CANE

KEEPING THE ENVIRONMENT SWEET

Many people have a sweet tooth, and so does the environment. When sugar is obtained from sugar cane, a valuable biomass is created that usually goes to waste. This we now use to create the disposable tableware of the future: 100 percent natural, 100 percent biodegradable and environmentally friendly.

Sugar cane SWEET INNOVATION

01

*Raw material
sugar cane straw*

02

*Extracted
plant fibres*

03

Finished product

Our appetite for sweet things is now also compatible with nature: the sugar cane juicing process produces large quantities of fibres – a **residual material that has previously remained unused**. And yet this biomass is extremely valuable for the production of natural disposable tableware and packaging. Sugar cane fibres can be used to make stylish products with outstanding properties: tableware made from sugar cane is **lightweight** but still very **robust**. At the same time it is **water resistant**, suitable for cold and hot foods and can be used in microwave, oven and freezer. With a bio-lamination

that creates a stronger grease and water barrier, the sugar-cane bowls become sealable and can be closed not only with lids but also with a peelable film in nature quality. This **sustainable full solution** expands the range of applications for sugar cane to the take-away sector, for instance. Production of the 100 percent biodegradable sugar cane range takes place close to the source of the raw materials, which protects the environment additionally by keeping transportation routes to a minimum. Our wide range of sugar cane products is available in light brown and white.

The 100% solution from nature

SIMPLE TO USE, NO LIMITATIONS

Thanks to our 15 years of experience with natural raw materials, **ready meals** can now be served **in a completely sustainable way** and free of plastic: the meal trays, the peelable films and also the matching lids are all made of fast-growing renewable raw materials and are 100% biodegradable.

The naturess ready-meal trays are made of sugar cane fibres and generate around 50% less CO₂ during production than conventional trays (made of part-recycled materials). The **bio-lamination**, which is also naturally biodegradable, protects each tray from water and sauces. In combination with our biodegradable and **peelable sealing films**, or with a lid made of PLA or sugar cane fibres, the natural packaging solution is complete. The wide product range is suitable for every imaginable application and with our easy-to-use sealing machines, ready meals are packed naturally in no time at all.

This sustainable alternative to plastic is ideal for meals with longer holding times, for dressed salads, sauce-based dishes, juicy meals or even for iced desserts. The ready-meal packaging withstands the cold of the freezer as well as the heat of the microwave and oven, and so can also be used for freezing or heating the food. As always, the closure must be removed before reheating.

Natural ready-meal packaging is simplicity itself. Watch now!

01 Menu tray

Trays made of fast-growing renewable resources and with bio-lamination. Can be used without any restrictions for hot, cold, greasy or liquid food.

02 Sealing tool

The right tool for every tray.

Made simple

10 CLEAR FACTS – ENDLESS POSSIBILITIES

- ✓ **100% biodegradable** integrated solution
- ✓ Made from **fast-growing renewable raw materials**
- ✓ **Plastic-free** packaging
- ✓ Menu trays made of sugar cane fibres generate **50% less CO₂** than conventional plastic trays
- ✓ Also suitable for sauce-based dishes thanks to **bio-lamination**
- ✓ Can be used for **cold and warm dishes**
- ✓ Freezer, microwave and oven safe
- ✓ **Easy to open** thanks to peelable sealing film
- ✓ Optional closure with lid
- ✓ Wide range for **every possible application**

03 Sealing machine

Efficient and easy-to-operate semi-automatic machines with adjustable sealing temperature and time.

04 Sealing film

Airtight film with easy opening. 100% biodegradable.

05 Lid

Matching lids optionally available for each tray.

P O L Y L A C T I C
A C I D (P L A)

LOOKS LIKE CONVENTIONAL PLASTIC

Even if they look very similar, the naturesses PLA products have nothing at all to do with conventional plastic. Because instead of using a finite resource, i.e. petroleum, they are made from an inexhaustible resource: natural lactic acid. And since this is obtained from starch derived from sugar cane, the disposable tableware is 100 percent natural, 100 percent biodegradable and eco-friendly.

Polylactic Acid (PLA)

LACTIC ACID AS AN ALTERNATIVE TO PETROLEUM

01

Raw material, e.g. maize, manioc and sugar cane

02

Granulated starch

03

Finished product

The use of plastic is under fire. But we are talking about conventional plastic, which is made from petroleum or polyethylene and is not naturally **biodegradable**. With the natural alternative, lactic acid, plastic-like products can be manufactured that not only have all the positive properties of conventional plastics, but also offer valuable advantages such as complete biodegradability and **climate-friendly** production. The 100 percent natural polylactides, commonly known as polylactic acids or PLA for short, are gained through the fermentation of carbohydrates – such as the starch

derived from fast-growing sugar cane. Soon we will have the capabilities to produce PLA from starch obtained solely from residues of nature.

Our PLA is **transparent, sturdy and shatterproof**. It can also be moulded into almost any shape and even used as a transparent film. Products made of PLA are eminently suitable for cold applications up to 45°C and are **lighter** than conventional materials – with no compromises in terms of function and stability. And in total harmony with nature.

Item no. 24436	Ø 9.6 cm	5.0 dl/20 oz	1200 pcs.

In order to **reduce the negative environmental impact**, single-use plastic beverage cups are subject to **marking requirements** in all EU countries. The marking on the cup informs the consumer that the cup is made of plastic or contains plastic and that it should be disposed of properly. It makes no difference whether they are made of traditional plastic or bioplastics like our naturrese PLA products.

A close-up photograph of a plant stem, likely a corn cob, showing a yellow, crystalline droplet of poly(lactide) resin. The droplet is attached to the stem and has a smooth, rounded shape. The background is a blurred green field under a clear blue sky.

CRYSTALLISED
POLYLACTIC ACID
(CPLA)

PERFECT BECOMES EVEN MORE PERFECT

A transformation that could not have been better. Crystallised polylactic acid (CPLA) is produced by crystallising PLA, a material that is already impressive in its own right.

The process makes the biodegradable material additionally heat-resistant and extremely rigid.

Crystallised Polylactic Acid (CPLA)
**CRYSTALLISING
OUT THE STRENGTHS**

01

*Raw material
e.g. sugar cane and manioc*

02

*Granulated starch +
heat and crystallisation*

03

Finished product

Sometimes a perfect product can be turned into an even more perfect product by crystallising out further benefits. This is the case with polylactic acid (PLA), which is the raw material for CPLA (crystallised polylactic acid). The crystallisation process brings out further strengths of the natural raw material: CPLA is perfect for **warm applications** and can withstand temperatures up to 85°C, making it ideal for coffee cups, for example. The material also becomes more **rigid**, which makes it possible, among other things, to produce ex-

tremely robust cutlery. Crystallisation makes the CPLA naturally milky in colour. With the addition of colour, the *naturesse* range of cutlery can also be supplied in beige or black, which underscores the **aesthetics**. CPLA is also pleasantly natural to the touch. Pure PLA is used in the *naturesse* CPLA products – no mixed compounds are used. The raw material base is guaranteed GMO-free and is processed into 100 percent biodegradable, stylish products without the addition of petroleum.

AND INTO THE DISHWASHER

Ever since the EU ban on single-use plastic cutlery came into force in 2021, you have a range of plastic-free cutlery alternatives to choose from: for example wood or paper cutlery, or reusable cutlery. Thanks to its special rigidity, our CPLA cutlery is dishwasher-safe to DIN EN 12875 and is made of rapidly renewable raw materials. The cutlery is biodegradable to DIN EN 13432 and tested for food safety.

CELLULOSE /
WOOD

The mark of
responsible forestry

FOR ONCE YOU ARE BARKING UP THE RIGHT TREE

Nature shows us the right path to follow when it comes to avoiding conventional plastics.

It leads us directly into the FSC® forests, where wood and cellulose are harvested for natural packaging. The FSC® certificate guarantees the lasting protection of the forest and the plants and animals that live in it. For tableware that is not only 100 percent natural, but also 100 percent honest.

Cellulose/wood with FSC® certificate
A FOREST OF BENEFITS

01

Raw material wood

02

Cellulose fibres

03

Finished product

Cellulose is a perfect raw material for making natural disposable tableware or packaging. But it all depends on where the cellulose comes from. For the production of the 100 percent biodegradable naturese cardboard range, our manufacturers use cellulose from FSC®-certified forests and from controlled sources. The FSC® label is a clear indication that the product originates from responsible forestry and so ensures the **protection of plants, animals, ecosystems**, soils and landscapes. An additional PLA layer, such as that used in our

paper cups, also makes the products **heat and moisture resistant**. In addition to their natural aesthetics, the wood, cardboard and paper products are also custom-printable and offer great freedom for stylish design. The diverse range is 100 percent biodegradable and climate-friendly.

B A M B O O

NATURE'S SPEED RECORD

Bamboo is a wonder of nature. And one that grows extremely fast. The record is around 90cm... per day. After harvesting, the stalks re-grow without human intervention. A wonderful basis, in other words, for the production of stylish and functional take-away tableware made of sturdy cardboard – without felling a single tree.

Bamboo

THE GRASSES OF THE FUTURE

01

Raw material
bamboo stalks

02

Extracted
bamboo fibres

03

Finished product

The saying «Trees don't grow into the sky» suggests that all good things come to an end. Bamboo, however, begs to differ. Certain types of bamboo can easily grow **half a metre in a single day** – a height that trees would only reach after many months. Once the bamboo has been cut, these grasses soon grow back again all by themselves. Bamboo needs no pesticides, no chemical fertilisers and **no artificial irrigation** to achieve its tremendous growth. All this is reason enough to make natural take-away tableware

out of it – tree-free. The cellulose of the bamboo fibres can be used to produce very sturdy cardboard that meets all take-away requirements. It has a light, brownish colour by nature. The delicate surface can be perfectly printed and is also a delight to the eye. The type of bamboo used is Moso, i.e. not the staple food of pandas, meaning that their habitat is left intact. The diverse range is 100 percent biodegradable and climate-friendly.

PAPERWISE – A GOOD SIGN

PaperWise stands for the process by which high-quality cardboard is made out of cellulose derived from agricultural residual materials. The PaperWise take-away products use agricultural waste products such as stalks and leaves. This means that no wood from trees is needed to make cardboard.

M A T E R - B I

BAGS OF NATURAL RESOURCES

Nature would surely love to give all those plastic shopping bags the sack. This is why the carrier bags, pouches and films from naturessa use no conventional plastic at all. Instead they are made from natural vegetable oil and vegetable starch (Mater-Bi). The tear-resistant bag range can even be disposed of via the household compost.

Mater-Bi

SHOPPING BAGS WITH A SECONDARY USE

01

Raw material vegetable
oil and starch

02

Granulated starch

03

Finished product

A lot of conventional plastic is still used for shopping. The semi-transparent shopping bags that have been the norm in retail up to now are made from petroleum and normally end up in the waste. Both aspects – bags made with a problematic resource and waste generation – are unnecessary thanks to the ideas of nature and the innovations of naturesses. The naturesses bags, pouches and films are made of a material called Mater-Bi, which is nothing other than a starch blend on the basis

of vegetable oil and vegetable starch. And the result is also strong: the solutions produced from Mater-Bi are **tear-resistant**, very robust and also breathable. As natural products, they return to nature again after use. All naturesses bags are certified to DIN EN 13432 and may be **disposed of in the household compost** without a second thought. This way, a shopping bag can have a second lease of life as a garden waste bag.

NATURE AS A GUEST AT YOUR EVENT

Nature is playing an increasingly important role in the area of events too. For instance, visitors are increasingly expecting a considerate approach to the use of resources, and sustainable catering technology is taken for granted. After all, an event is supposed to be an occasion for positive emotions – and cues from nature are conducive to this.

Pacovis AG – which owns the nature brand – is pleased to actively support you in the organisation and execution of major events: from our wide range of event products, you choose the right ones for you and benefit not only from an initial delivery of stock, but also from precise supply and stock management. If requested, our staff can support you around the clock at events and guarantee that everything runs smoothly with stylish products from nature.

Your
**STRONG
PARTNER**

DISPOSAL – A GOOD QUESTION

One issue that keeps coming up is how to dispose of nature's items properly. After all, the raw materials used are all 100 percent biodegradable. So where should they go when they've served their purpose? Unfortunately, every country, every region and even almost every municipality has different requirements and different regulations, so there is not just one simple answer. But one thing is the same everywhere: regardless of whether the products are fermented, composted, biodegraded or incinerated, the nature's items are always more ecologically sound than conventionally produced single-use tableware made from fossil raw materials. The method of disposal plays a lesser role in the sustainability debate.

Our technical experts are happy to advise you. We look forward to hearing from you!

YOUR DESIGN AS AN EXQUISITE TOUCH

Your decision as a company to choose sustainability already meets with widespread approval. You can build on this and associate your brand directly with the natural packaging – by having everything imprinted to your custom design. Draw attention to yourself and give your customers your own design or messages as a delicious side dish.

Whether meal trays, napkins, products for hot and cold drinks or many other forms of single-use packaging made from natural raw materials – we have the expertise to give comprehensive advice on how to best imprint and personalise your items. Because naturally it's a stylish solution you're looking for. But it's also a matter of food safety, industry standards, laws and shelf life. Pacovis has a team of experts who support the customer from the consultation

stage through to the production process and expertly bridge the gap between developers and packaging manufacturers.

The imprinted items are **marked with a symbol** in this catalogue.

A man with short grey hair and a beard is sitting on stone steps. He is wearing a light blue button-down shirt, dark blue jeans, and brown leather shoes. He is holding a brown paper coffee cup with a black lid in his right hand and a brown paper sandwich bag in his left hand. He is smiling and looking off to the side. The background shows more stone steps and a dark jacket lying on the ground.

OUR RESPONSIBILITY – YOUR SAFETY

We, the owners and all the staff of Pacovis, embrace our responsibility towards people, towards the environment and towards you. This is evident in our efforts to ensure fair working conditions, the care we take with respect to the environment and our great commitment to food safety.

All our suppliers guarantee **socio-ethical** and **ecological** procurement practices in compliance with the ILO conventions. Preference is given to suppliers who are additionally certified compliant with ethical standards such as Sedex, SA 8000 or BSCI. Throughout the entire manufacturing process, we adhere rigorously to all laws, provisions, rules of conduct and industrial standards – labour law, fiscal legislation, European and international law and the core UN conventions.

We take the utmost care in protecting food quality and **food safety** aspects. We comply with and exceed requirements in the areas of food-grade approvals, foodstuffs law and food packaging, and are certified to recognised industrial standards. We fulfil the safety and hygiene requirements in accordance with the GFSI standards HACCP, IFS, BRC, FSSC 22000 and offer you labels such as Sedex, FSC®, ISO 14001, VLOG, Organic Farming Ordinance and several more.

Particularly noticeable is the social and ecological commitment in the products of the *naturesse* brand. Socio-ethical guidelines and ecological procurement are of paramount importance here. In addition to compliance with all specifications and the above certifications, the entire *naturesse* product range is certified to DIN EN 13432, which guarantees residue-free compostability. Plus, since 2001, we fully offset all relevant greenhouse gases, like CO₂ emissions, through our cooperation with ClimatePartner so that you can serve your food and beverages in 100% climate-neutral *naturesse* products.

FAIR
AND SAFE,
guaranteed

CERTIFICATIONS AND LABELS IN BRIEF

OK COMPOST HOME TÜV AUSTRIA

The OK compost HOME logo guarantees that a product is fully biodegradable in garden compost and has no negative impact on the environment.

DIN EN 13432

DIN EN 13432 stands for «industrial compostability» and means that a material degrades to water, carbon dioxide and biomass in industrial composting operations under defined conditions (time, temperature, oxygen, humidity) and in the presence of microorganisms or fungi.

DIN EN 12875

The standardised symbol for both the DIN EN 12875 and DIN EN 12875-2 standards indicates that household goods are dishwasher-safe in the broadest sense.

SA 8000

SA 8000 is an international standard that seeks to improving working conditions, and serves as a minimum requirement for social and labour standards. SA 8000 is based on conventions of the International Labour Organization (ILO) and the United Nations (UN).

SEDEX AND SMETA

Supplier Ethical Data Exchange is a membership organisation for companies that have committed themselves to continuously improving ethical standards in their supply chain. The audit covers areas such as working conditions, occupational health and safety, environmental management and hygiene.

ISO 14001

The international environmental management standard ISO 14001 sets out internationally agreed requirements for an environmental management system, and is part of a family of standards. This includes numerous other standards in various areas of environmental management, such as life cycle assessments, environmental indicators and environmental performance evaluation.

FSC®

FSC® stands for «Forest Stewardship FSC®», an international certification system for more sustainable forestry. FSC®-certified forests and plantations, which among other things are subject to strict ecological and social principles are managed in order to protect conservation.

FOOD SAFETY

Food safety includes the aspect of hygiene. It stands for all measures and concepts that are intended to ensure that food is suitable for consumption by the end consumer without any adverse effects or damage to health.

CLIMATE NEUTRALITY

Reducing the pollutant emissions generated by our nature products is our number one goal when it comes to climate protection. We are able to offset the remaining emissions by working together with ClimatePartner on recognised climate-protection projects – from the cultivation of the raw materials to production all the way to delivery. You can find out more on page 7 of our catalogue.

DISTRIBUTION PARTNERS – NATURALNESS TRANSCENDS BORDERS

Advice and product availability in 14 countries.

Sustainability is very much in demand. Thus it is that we are delighted to offer you our natural products of the naturessse brand in nearly every European country. Regional distribution partners are always ready to help you with expert advice, and can supply you directly from the local warehouses. That way you benefit from short de-

livery times and competent regional support. The distribution network is organised from our headquarters in Switzerland and our three subsidiaries in Germany, Austria and the Czech Republic. In addition, we have established exclusive partnerships for you in some countries in order to offer you expert local support.

Happy to Serve.

A PROMISE THAT MAKES EVERYONE HAPPY

«Happy to serve» is the core of all we do, a credo we have always lived by since our founding in 1935 and are now communicating to you conceptually and visually through our entire presentation: we search out the best solutions for you, look ahead conscientiously on your behalf and make every effort until you are completely thrilled. **All in line with our motto: «Happy to Serve».**

Serving is part of your job. And ours too. **Making the guest happy** is the top priority. This has been our guiding principle for almost 90 years, and everything else flows out of that. We are a traditional Swiss company with 500 or so staff and the very special passion to serve up the very best for you, always with a smile.

Our group of companies has grown many times over since its founding – and now has branches in Switzerland, Germany, Austria, the Czech Republic, Russia, Romania and Turkey as well as sales partners throughout Europe. We tackle challenges with joy and passion and make your daily work easier so you

can focus on your core business. Pacovis supports you with products and knowledge from the following areas:

- Food solutions
- Food packaging, catering
- Consumables
- Hygiene, cleaning and occupational safety

Our success over the past decades is based on a clear recipe: it takes an alert mind. Because it's only by listening attentively that we can present the right solutions – on a silver platter, as it were. You could say our **exceptional customer proximity** is our open secret for every perfect idea. But it also requires persistence and consistency. Because the best answer to your needs has to be well-researched and optimally developed. In combination with an unprecedented commitment, this results in complete satisfaction. Your satisfaction. And ours too.

PRODUCT OVERVIEW

On the following pages you will find an overview of the broad naturessse range, showing all the various products and forms presented in the catalogue. Please note that the photos of the various items are not to scale.
